Appendix 5 Evidence-log structure

The complete source register contains 2,061 indexed rows and remains in the supplementary workbook. Table A5-1 shows the fields used to keep provider conclusions traceable.

Table A5-1 Evidence-log fields

Field	Purpose
Provider and evidence ID	Identifies the company and the individual evidence record.
Capability or market topic	Links the record to the relevant comparison area.
Claim or observation	Records the provider claim, external confirmation or researcher observation.
Supporting detail	Adds the context needed to understand the claim.
Current or future status	Separates current capability from announced or planned items.
Evidence type and verification status	Distinguishes provider material, external corroboration and direct observation.
Evidence strength	Records the 0-5 confidence judgement.
Source title, URL and dates	Makes the evidence traceable and time-bound.
Caveat or verification boundary	States what the evidence does and does not confirm.
Dataset file	Links the extracted record back to the provider workbook.
